

Goodyear Bus Tires For Charter Applications.

Transportation services, such as charters, tours and sightseeing, require versatile tires that can handle the unique combination of conditions they face every day on the road. Goodyear bus tires help you meet the challenge by offering long tread life for miles of highway driving and toughness for city streets.

This balance of beneficial features was created with bus fleets in mind.

G409 MBA™

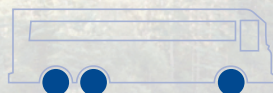

Many Miles For The Money

- Deep Tread helps enhance miles to removal for long tire life.
- Tread Pattern and Compounds help reduce rolling resistance, provide a comfortable ride and offer solid handling.
- Belt Package helps enhance toughness and tire life.
- Tread Pattern helps evacuate water from under the tread for traction on wet roads.
- Straight, Wide, Five-Rib Construction helps promote uniform wear for long tire life in charter applications.

Intercity Cruiser®

Offers A Low Cost Per Mile

- Deep Tread helps enhance miles to removal for long tire life.
- Sidewall Protector Ribs help resist sidewall scuffing.
- Tough Rubber Compounds help resist excessive wear, chunking, cracking and chipping.
- Belt Package helps enhance toughness and tire life.
- Tread Pattern helps evacuate water from under the tread for traction on wet roads.
- Wide, Circumferential Grooves, Extended Lateral Grooves and Non-Evolving Tread Design help deliver all-season traction.

WARNING: With respect to the use of all Goodyear bus mileage tires, any use other than as imprinted on the tire is unsafe. Improper use could render the tire unserviceable and could jeopardize the lives and safety of operators and passengers.

Goodyear assumes no responsibility for any accident, injury or damage caused by special mileage tire failures due to misuse or the failure to follow proper maintenance and installation procedures.

NOTE: Federal Motor Carrier Safety Administration (FMCSA), Regulatory Guidance for the Federal Motor Carrier Safety Regulations, Part 393.75(d): "No bus shall be operated with regrooved, recapped or retreaded tires on the front wheels." Other requirements apply, including federal and manufacturer standards.
