

**GOODYEAR  
COMMERCIAL  
TRUCK  
RETREADS**

## UniCircle<sup>®</sup> Retreads.

Goodyear UniCircle retreads offer like-new performance and appearance characteristics. They feature a spliceless construction because they're made using Goodyear's patented retreading process.

UniCircle retreads adhere snugly to the casing to enhance traction and reduce costly tearing and chunking. Plus, they incorporate Goodyear's exclusive UniCircle compound that helps enhance traction and treadwear.

You can expect lasting toughness from the spliceless UniCircle construction, as well as even treadwear and low rolling resistance due to its uniform retread characteristics and dimensions. The end result is cost-efficient performance.
