

**AMENDMENT**  
**THE GOODYEAR TIRE & RUBBER COMPANY**  
**GLOBAL SUPPLIER QUALITY MANUAL**

The following amendments are made effective March 1, 2013, (“Effective Date”) to The Goodyear Tire & Rubber Company Global Supplier Quality Manual Version GSQM-05.

As of the Effective Date, the following amendments are made and anything to the contrary is deleted:

- 1) The GSQM requires suppliers of "Raw Material" (that become part of Goodyear manufactured tires, tubes, flaps or rubber parts) to be third party registered to ISO 9001 by an accredited third party certification body.
- 2) Section 3.2.1 of the GSQM shall be deleted in its entirety and replaced with the following:

There shall be no changes of the material without timely prior written notification, which shall include the estimated implementation date and be provided to the appropriate Goodyear Innovation Center and Procurement contact. A change means (regardless of whether the Certificate of Analysis results change) any of the following:

A change in the location of manufacture; or

A change in the manufacturing process (eg. equipment change); or

A change in the supplied “Raw Material”

For the avoidance of doubt, a change is **not a new source for an incumbent “Raw Material”**.

- 3) To the extent these amendments conflict with The Goodyear Tire & Rubber Company Global Supplier Quality Manual Version GSQM-05, the order of precedence shall be as follows: these amendments, then The Goodyear Tire & Rubber Company Global Supplier Quality Manual Version GSQM-05.
- 4) In all other particulars and respects, except as herein expressly revised, The Goodyear Tire & Rubber Company Global Supplier Quality Manual Version GSQM-05 remains in full force and effect.
